The Papal Breach of Covenant

The Breach

Franciscus is a Latin given name, originally an epithet meaning "the Frank, the Frenchman". It was applied to Saint Francis of Assisi (1181/82–1226).

Francis of Assisi began preaching around 1207 and travelled to Rome to seek approval from Pope Innocent III in 1209 to form a new religious order. The original Rule of Saint Francis approved by the Pope **did not allow ownership of property, and requiring members of the order to beg for food** while preaching. The austerity was meant to emulate the life and ministry of Jesus Christ as Assisi had falsely interpreted it.

This is NOT the example that Jesus Christ left for humanity. Jesus promoted material and spiritual prosperity for all, and it has always been the Church's responsibility to secure and promote this prosperity for all humanity and the planet.

Healing The Breach

Since 1209 A.D. there has existed a breach of covenant between the Universal (Catholic) Church (representing God) and humanity. As Adam and Eve defaulted on their mission to Urantia, likewise did the Papacy default on its mission to Urantia by adopting the abhorrent and false beliefs of Francis of Assisi of not allowing the ownership of property (the value of one's work) and requiring members to beg for food and shelter, against Christ's teachings, and thereby enslaving mankind and the planet.

Pope Francis acting in his "temporal role" as FRANCISCUS and his appointee, the Rector of the National Shrine, are responsible for the entire planet's well-being.

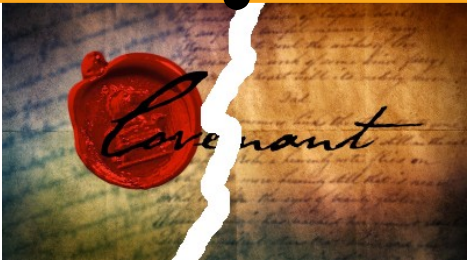

Just as the breach was opened by a Francis, so will the breach be closed by a Francis. But why a Jesuit as Pontiff? In the Catholic Church, Jesuits are the equivalent of the Melchizedek Order in the Local Universe. Jesuits are the teachers and emergency workers entrusted with teaching and defending the faith. He is the right man for the job.

The Royal Breach of Covenant

The Breach

Queen of England Elizabeth I was called the Virgin Queen for her alleged virginity which, politically, was the result of a clever mix of moralizing political communication and religious deception, inspired by the Cult of Mary the Mother of Christ. A sophisticated psyop was orchestrated to position Elizabeth I as the Mother of the Nation in England’s collective consciousness.

Biologically, this alleged virginity is explained in simpler terms by those who claim she was actually a man. Think Michelle (Michael) Obama...future proves past.

She never married and died in 1603, aged 69, without an heir after 44 years on the throne. She died without naming a successor, so her first cousin twice removed from her grandfather Henry VII, King James of Scotland, was selected to rule. Yes it’s the King James who ordered the Bible translated into English in 1604 and was published in 1611.

She was also called the Witch Queen of England because of her strong interest in the occult sciences and her extremely close ties to the occultist and renowned necromancer John Dee.

Healing The Breach

The breach of covenant created by Queen Elizabeth I was twofold.

First, by failing to provide a proper heir she opened the door to those who would lead England astray with the compromised James of Scotland.

Second, by commandeering individual sovereign consciousness (free will) into a potent and harmful Luciferian witches’ brew of collective consciousness.

By resurrecting ancient Egyptian rituals that would allow her to be unknowingly worshipped by her people and still reign over them after her death, like a phantom. This is the reason she did not designate a successor. The results of this breach are still felt today as massive dark egregores of collective thought.

The mystery around her gender was part of the transformation and initiation ritual that would solidify her physical constitution in her after world (Abyss).

Just as the breach was opened by an Elizabeth (I), so will the breach be closed by an Elizabeth (II). It remains to be seen whether the monarchy will continue after her death, or if will cease.
