

# The Supreme Spirit of Truth and the 52 Supreme Adjutant Mind Spirits of Nebadon

## The Primary Deity Realities

### ETERNAL FUSION OF THE FINITE AND THE INFINITE

UB: 0:7.9. The Supreme Being is not a direct creator, except that he is the father of Majeston, but he is a synthetic co-ordinator of all creature-Creator universe activities. The Supreme Being, now actualizing in the evolutionary universes, is the Deity correlator and synthesizer of time-space divinity, of triune Paradise Deity in experiential association with the Supreme Creators of time and space.

When finally actualized, this evolutionary Deity will constitute the eternal fusion of the finite and the infinite—the everlasting and indissoluble union of experiential power and spirit personality.

UB: 0:7.10. All time-space finite reality, under the directive urge of the evolving Supreme Being, is engaged in an ever-ascending mobilization and perfecting unification (power-personality synthesis) of all phases and values of finite reality, in association with varied phases of Paradise reality, to the end and for the purpose of subsequently embarking upon the attempt to reach absonite levels of supercreature attainment.

## The 7 Master Spirit Influence Reaches the Circle of Infinity

### THE MASTER SPIRITS

A: The focal centers of the Master Spirits are located on Peripheral Paradise and rotate in accordance with the movement of the Superuniverses.

B: The entire Spiritual influence of the Master Spirits over the Supreme and Ultimate Master Universe levels rotates counterclockwise following the cadence of the physical Superuniverses, as shown by the small red arrows in each OSZ and outside gray arrows.

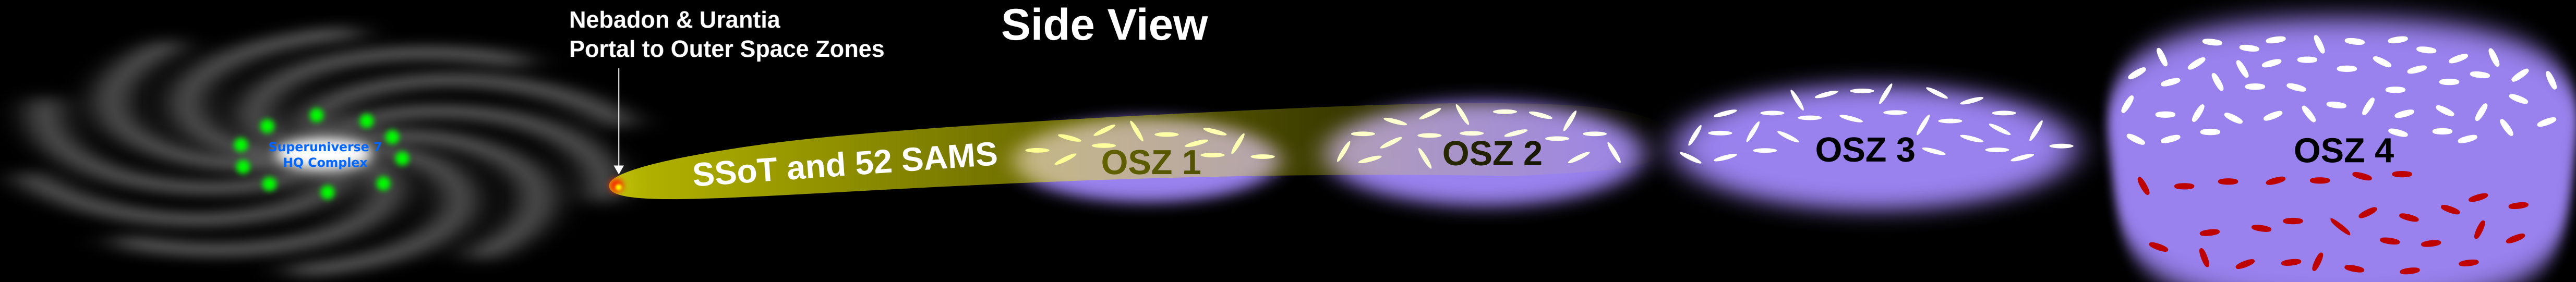

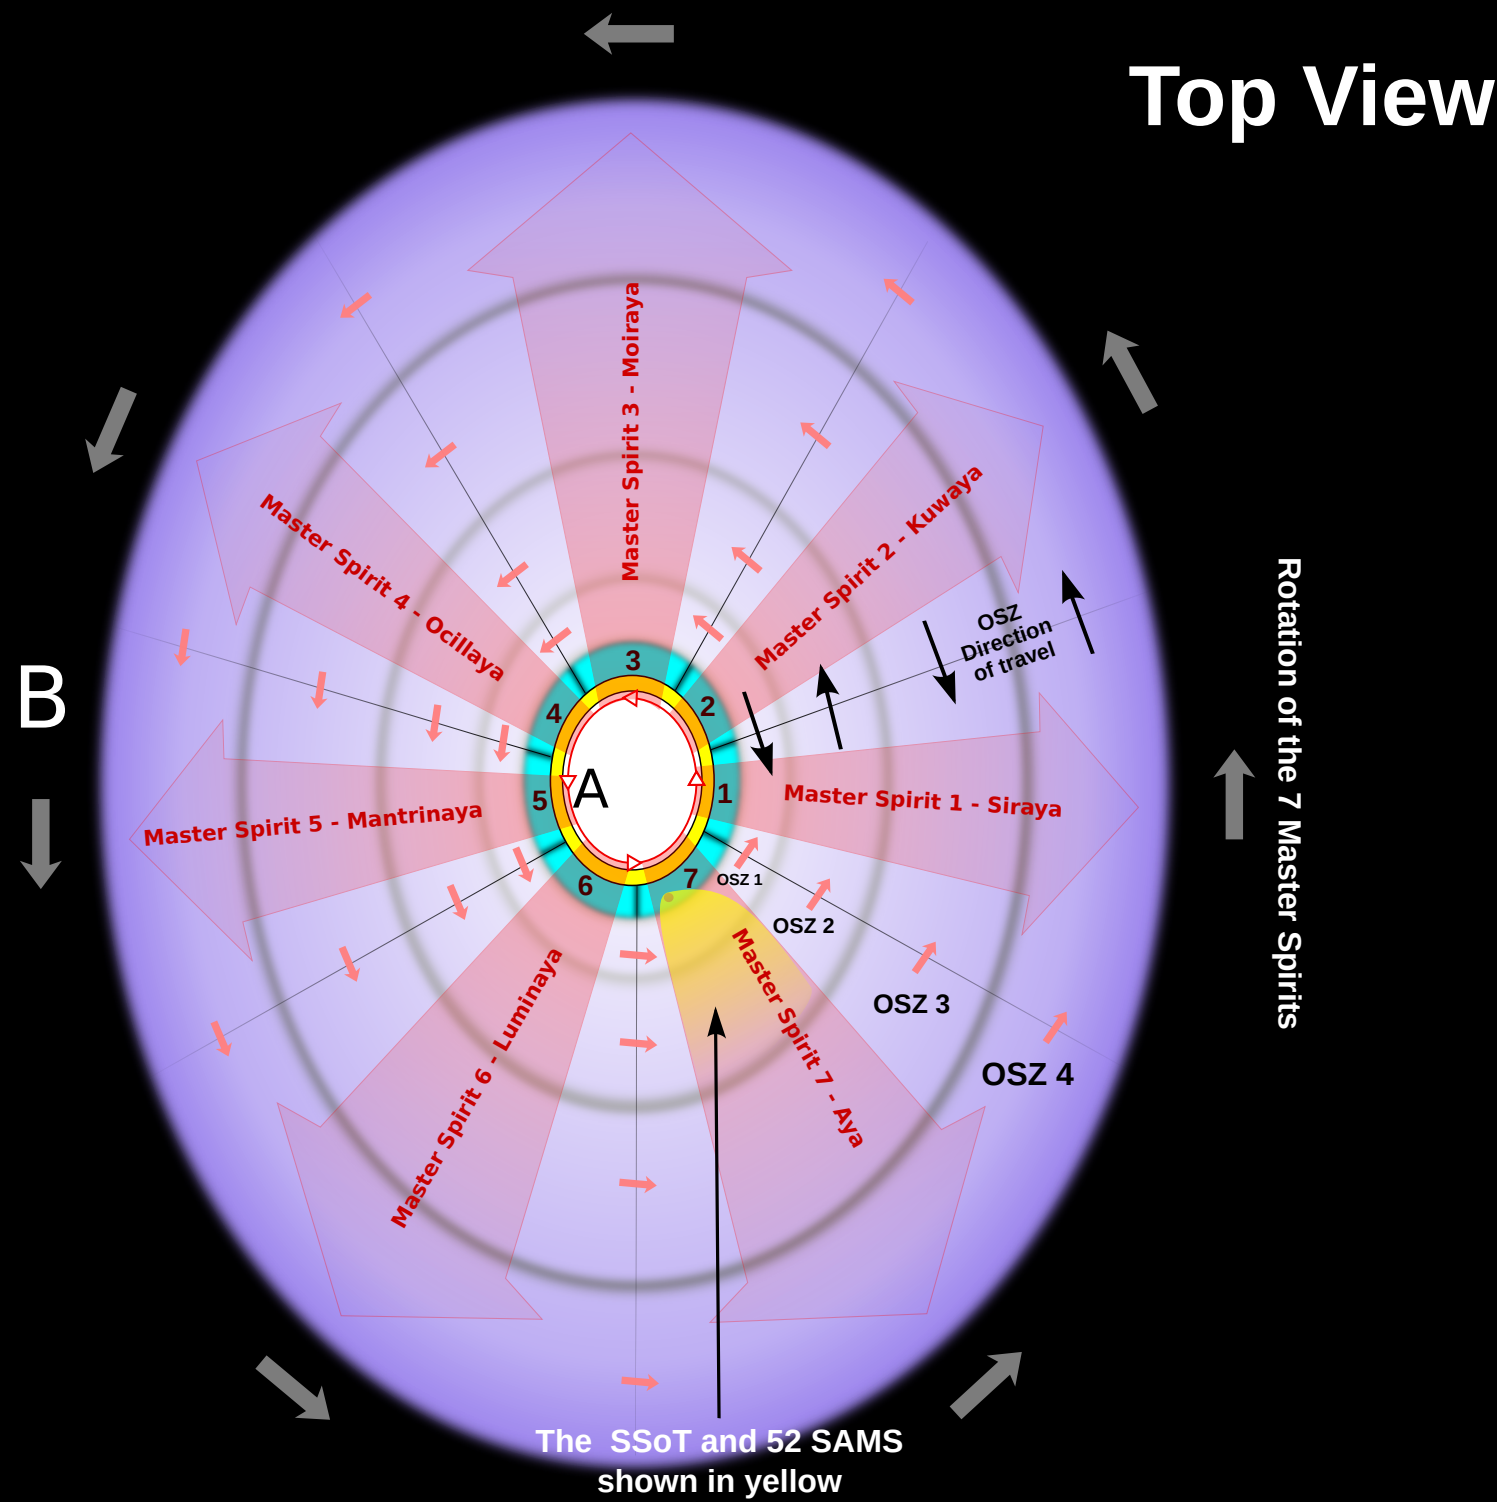

This creates an interesting situation in regards to the 4 physical outer space zones in that OSZs 1 and 3 rotate in opposite direction to the seven Master Spirit influences. This implies that each of the seven segments of Master Spirit influence spends a much shorter amount of time influencing the universes of OSZs 1 and 3, but the spiritual influence will happen more frequently.

Also consider that OSZs 2 and 4 each execute a full orbit around Paradise at different rates. OSZ 4 has a much longer distance to cover in each orbit, yet the influence of the Master Spirits moves at a uniform orbital revolution over all the space levels.

In summary the following factors are involved: The Master Spirit influence rotates counterclockwise at the same cadence as the Superuniverse orbit around Paradise.

Outer Space Zones 1 and 3 orbit in an opposing clockwise direction.

Each successive space zone take significantly longer to complete an orbit around Paradise.

### ORBITS AND ROTATION

In order for Nebadon and Urantia to remain in the spatial position needed to function as the portal to the Outer Space Zones, which is near the edge of OSZ 1, it is necessary for the Milky Way galaxy to spin around its axis at the exact same cadence that it orbits around the Central Isle of Paradise.

Likewise our moon spins on its axis every 28 days, and it also circles around Earth every 28 days. That way the two circuits are synchronized and the same side of the moon is always facing Earth.

The Supreme SoT and the 52 Supreme AMS of Nebadon will be transmitted through the Ultimate Portal to be located in Antarctica. Transmitting station will be located over the South Pole and will broadcast to the Outer Space Zones. OSZ 1 will receive the signal full strength but OSZ 2 will receive a signal of decreasing strength. OSZ 3 and 4 will not receive these signals as they will be sufficiently close to perfection so that they don't need them.
