Monjoronson

The term Monjoronson has become widely used in the Urantia community, and several explanations for this name are floating around. TBG Commission's understanding of the name Monjoronson is as follows:

There appears to be French elements in the name.

In French MON = MY (individual)

In French JOR = DAY (Daynal) -- in French JOUR means DAY

In French ON = WE (group)

In French SON = SON (serve) -- in French SON can have many meanings

Translated into English and expanded gives us: MY DAYNAL WE SERVE

It is for that reason that TBG Commission considers Monjoronson to be a Paradise Trinity Operation under Christ Michael's management, consisting of a team of high spirit beings under the direction of the Daynal known as Margul. We often encounter Monjoronson communicating as an apparent personality in a great many teaching mission transcripts and other transmissions. We believe that Monjoronson may at times express itself as a collective, and at other times it could be Margul speaking personally under the pseudonym Monjoronson when it involves collective matters. When Margul speaks solely from his own Daynal authority on matters outside the scope of the Monjoronson operation, he identifies directly as Margul.

In addition we see Margul as the focalization platform for the Consummator of Universe Destiny who remains under Paradise Philosopher overcontrol, while Supreme coherence back-testing is conducted by the Avonals working through reflectivity under Majeston.
